

TBS X509 SSL SGC – Server Gated Cryptography

The TBS SGC X509 is a 3-factor certificate made from SGC technology. It assures data encryption between a client and a server and the authentication of the website, its owner and the physical existence of the company. It enforces as well a 128-bit cipherment on less recent browsers.

Test this product freely during 30 days thanks to an entirely functional test version.

TBS INTERNET Trust Booster

With 15 years heads-on experience and a detailed technology understanding, TBS Internet specialized in online business security. Since 1996, our expertise is appreciated by public listed companies, SMEs, civil services and leading companies.

As certification authority, TBS Internet also designs its own high authentication certificates. Our X509 products are competitive and recognized by over 96% of web browsers.

We maintain platinum level partnership with these certification authorities:

Mono-site server certificates

Multi-site server certificates

Developer certificates

Client certificates

Trust seal

The satellite encyclopedia **Information about artificial satellites**

At the cutting edge of technology, TBS Internet is also a forerunner in the matter of gathering and broadcasting information. TBS Internet publishes one of the three worldwide reference work: The Satellite Encyclopedia.

Consulting **Internet: a strong expertise**

TBS Internet advises and guides local ISPs, local or national hosting companies and key accounts' incorporated services.

TRUST BOOSTER

40% of French server certificates are provided by TBS INTERNET

Over 7000 references all around the world

Leading SSL aggregator since 1996

TBS X509, TBS Internet's own brand, was created in 2006 to provide a wide range of server and user certificates.

A 10 years experience in selling SSL certificates and a first range technical support are TBS Internet's assets to compete with the actors of the Internet security market.
